

Hands are the most frequent body parts injured at work.

Hand injuries can be very painful and can result in permanent disability.

PREVENT HAND INJURIES

Recognise the hazard:

- Minimise exposure to unnecessary risks
- Adequately protect your hands

Follow Safe Work Practices:

- Use correct tools and tool holders
- Use Tag Lines
- Practice good hand hygiene
- Create safety buffers – distance, equipment guarding, body and hand position, PPE

Report all injuries to your leader.

Develop a work practice to keep hands away from “the Danger Zone!”

Don't position your hands where they can be:

- **Cut** or punctured by sharp objects
- **Burned** by hot objects or chemicals
- **Pinched** between objects
- **Struck** by objects (stored energy)

Use PPE (Personal Protective Equipment):

- Use the correct gloves required to perform the task

WORLDWIDE REACH. HUMAN TOUCH.
